GEIGER Style Guidelines

1. Logo Specifics 3
2. Clear Space 3
3. Logo Variation 4
4. Typography in Use 5
5. Colour Specifications 6
6. Colour Gradients 7
7. Logo Best Practices 8
1. Logo Specifics

Our logo is the face of GEIGER - the primary visual expression to use to identify ourselves, meaning that we need to be careful to use it correctly and to do so consistently.

2. Clear Space

Clear space prevents type, imagery or other graphic elements from interfering with the legibility of our logo. No graphic elements should encroach the border around the logo.

The white space should best be around 50% of the height of the logo on each side, but this depends on the application. (Measure the clear space by the height of the letter G.)
3. Logo Variation

Which GEIGER logo will be chosen will depend on the background and production method.

When using the logo on a white background, you can use the full colour version or the black colour logo.

When using the logo on a colour background, please use either the black colour logo or the white colour logo.
4. Typography in Use

The following fonts are used in the GEIGER Project together with the logo:

1. **TT Norms** or **Arial**
   - for headlines, pagination, footer & header texts

2. **Times New Roman**
   - for lead texts, enumerations, table titles, captions

---

**Headlines in TT Norms or Arial**

Lead text as well as longer explanatory titles (see Powerpoint Template) are in Times New Roman.
5. Colour Specifications

The primary colours are a green as well as a light green.

Secondary colours are red and yellow also in two shades. The secondary colours are mainly used in the background for gradients.

→ 6. Colour Gradient
6. Colour Gradients

The gradient is a background design element. It attracts the viewer’s attention and can help focus the eye on important messages and information.

The colour gradients are made using the darker shades of the primary and secondary colours.

The gradients start in the top left corner.

At the end of a document the gradients may be placed on the bottom right corner.
7. Logo Best Practices

Please DO NOT do the following:

- DO NOT squish the logo, please resize the logo in proportionally.
- DO NOT use the coloured logo on a saturated colourful background.
- DO NOT place the logo on patterns, images or gradients. Please make sure to leave sufficient clear space around the GEIGER logo.
- DO NOT place the logo vertically.
- DO NOT use any other fonts other than Times New Roman, Arial or TT Norms.
