

GEIGER

A green icon of a geiger counter, consisting of three concentric curved lines radiating from a central point, positioned to the right of the word 'GEIGER'.

**Easy and affordable
cybersecurity solution for
small businesses**

Businesses are increasingly going digital. This also increases the likelihood of cyber incidents.

It's crucial to be aware of your risks related to cybersecurity & data protection – and to take the right steps to reduce them.

GEIGER is an easy-to-use and affordable solution that helps you understand and manage the risks of your company, and offers support whenever needed.

What does GEIGER do?

1

GEIGER helps you understand what the risks to your business are.

We help you assess your risks based on your location, industry, ICT infrastructure, and cybersecurity skills – with an easy-to-use app.

2

GEIGER gives you tools that fit your needs and resources.

We give you personalised recommendations for improving the security of your company with state-of-the-art tools and services.

3

GEIGER offers support whenever you need it.

We connect you with trained Cyber Security Defenders who are ready to help.

GEIGER is developed by an international group of experts, 18 partners from nine countries, as a response to the cybersecurity challenges of small businesses with a limited expertise and a restricted budget.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 883588 (GEIGER).
