

GEIGER

**Easy and affordable
cybersecurity solution for
small businesses**

Cybersecurity is not simple, but simple measures can make all the difference!

It's crucial to be aware of your risks related to cybersecurity and data protection – and to take the right steps to reduce them.

GEIGER is an easy-to-use and affordable solution that helps you understand and manage the risks of your company, and offers support whenever needed.

What does GEIGER do?

1

Helps you to understand the risks

GEIGER helps you to assess your risks based on your location, industry, ICT infrastructure, and cybersecurity skills – with an easy-to-use app.

2

Gives you tools that fit your needs and resources

GEIGER gives you personalised recommendations to improve the security of your company with state-of-the-art tools and services.

3

Offers support whenever you need it

GEIGER connects you with the community of trained Security Defenders who are ready to help.

GEIGER is developed by an international group of experts, 18 partners from nine countries, as a response to the cybersecurity challenges of small businesses with a limited expertise and a restricted budget.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 883588 (GEIGER).
